

Apex Energy Company for General Trading and Contracting W.L.L was established in March 2013 with the intention of serving customers in the oil well drilling & oil field services, refinery, marine and construction industries.

With its competent technical capabilities and equipped with a comprehensive mechanical manufacturing (machine shop) base facility, a second rig structure/components fabrication shop and pressure control equipment refurbishment facility in the East Ahmadi industrial area and supported by partner companies with their own facilities, Apex is poised to serve its customers by providing end to end trouble shooting, manufacturing and supply services.

Corporate Office

80 Sq. Mtr. Office space at 5th Floor, Fahaheel Center (Bldg # 14), Block 70, Fahaheel with adequate infrastructure to facilitate administrative staff.

Management Offices & Workshops

500 Sq. Mtr. Office, 1000 Sq. Mtr. Workshop and 3500 Sq. Mtr. Open yard at Plot 35, Block 8, East Ahmadi with machinery and infrastructure to handle the drilling support services activities mainly precision drilling tool manufacturing and repair work.

250 Sq. Mtr. Office, 2500 Sq. Mtr. Workshop and 3,000 Sq. Mtr. Yard at Plot 59, Block 8, East Ahmadi with machinery and infrastructure to handle the heavy structural fabrication, rig refurbishment and pressure control equipment repair activities.

Oil field Machine Shop

A fully fledged Machine Shop certified to **API Q1** & **ISO** Quality Standards with technical accreditation monogram licenses (valid up to May 2020)

covering Spec **7-1, 5CT, 6A, 16A & 16C**. Key products and services includes **manufacture and servicing of Pup Joints:** Casing and Tubing and Accessories; **Wellhead and Wellhead Components:** Cross over connectors, Top connectors, Tees & Crosses, WN/companion flanges, Adapter & Spacer spools, etc.; **Drill Stem Elements:** Crossover subs, Lifting subs, Stabilizers, etc.; **Drill Through Equipment:** Drilling spools, Mud cross, DSAs, etc.; **Choke and Kill Equipment:** Choke and Kill Manifold Assemblies, Rigid Piping & Buffer chambers; **Repair and remanufacture** of drill stem element connections, crossovers, drilling spools and high pressure piping; **Refurbishment and testing** of BOP Control Systems, Valves, Choke and Kill Manifold, BOP, Rig handling, Hoisting and Rotating equipment, etc.

Fabrication Facility

Fabrication yard with ASME certification - U, PP and NB-R (valid up to Aug 2019) focusing on the design and fabrication of pressure vessels, silos, water and fuel tanks and other structural fabrication; design, fabrication and installation of Mud Systems (500-4500 bbl); fabrication/repair of structural rig components, etc.

Hard banding Services

Drill Pipes and HW's - GMAW (automatic) with Castolin OTW 13CF and Arnco XT100/XT300/XT350 filler materials

Hard facing Services

Stabilizers and Motor Sleeves - Tungsten carbide -Type W 20-30 mesh rod

Repair & Pressure Testing

High pressure test unit of data logging system with test capability up to 30000 psi. Facility capabilities include the repair / refurbishing and high pressure testing for BOPs, BOP control systems together with choke and kill manifolds, stand pipe/cement manifolds, etc.

Non Destructive Testing

In house facility for Magnetic Particle Inspection & Dye Penetrant Inspection.

We are also **OHSAS 18001:2007** certified (valid up to May 2019).
